

NHS Innovation Services

At Health Enterprise East we provide innovation management services to the NHS and academia. Our specialist team ensure that pioneering innovations from front-line NHS staff and researchers are identified, developed and commercialised for the benefit of patients.

Established in 2004 as an NHS Innovation Hub, we have a substantial track record of commercial success working with partners to bring new medical technologies to market.

Hosted by founding member Royal Papworth Hospital NHS Foundation Trust, we provide the technology transfer expertise to enable our member NHS organisations to develop and deliver their commercial innovation strategies.

INNOVATION SUPPORT AT EVERY STAGE

HEE enables NHS organisations and their staff to translate novel ideas into new products and services that will benefit patients, the NHS and the wider economy.
